

FLAP VALVE ANTISTATIC

PLPA/PLPM

The flap valve is made of black antistatic plastic, resistance: $\leq 10^6$ Ohm/cm, equipped with a self-closing spring cap.

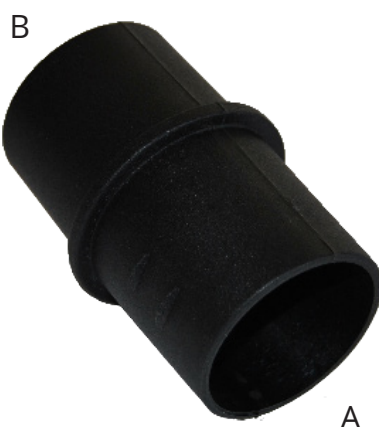

The valve valve is mounted on the pipe with PICO coupling and fits flexible hoses, connected through HOPO hose coupling.

PLPM has a micro switch that starts the system when the cover is opened.

A: Indicates the pipe diameter.
B: Indicates diameter HOPO hose coupling.

HOSE CONNECTOR ANTISTATIC

HOPO

Hose coupling suitable for PLPA/PLPM, made of black antistatic plastic, resistance: $\leq 10^6$ Ohm/cm.

A: Indicates hose diameter.
B: Indicates diameter against flap valve
