

RUPR - Rubber gasket

Galvanized steel - Pull ring edge

RUPR rubber ring for pull rings. The rubber gasket rings are made of EPDM 80 rubber and used for pull ring edge assemblies to improve degree of tightness. One ring is fitted for each assembly. Rings are fitted on either pull ring edge before assembly. Rubber gasket rings are U-shaped in cross section. Hardness is 80 shore, and working temperature range is -40°C to +100°C.

RUPR - Rubber gasket
